

国際医療福祉大学

International University of Health and Welfare

April 14, 2021

Dear Prof. Tran Diep Tuan,
President, University of Medicine and Pharmacy, HCMC

Request for Recommendation of Senior Lecturers and Assistant Professors

We would like to first extend our appreciation for your continuous support to the International University of Health and Welfare (IUHW).

With the aim to further enhance our academic environment, we would like to request for your recommendation of senior lecturers and assistant professors in the fields of basic and clinical medicine who are interested in working at our IUHW School of Medicine on Narita Campus. 25 faculty members from overseas have joined us so far as the members of the School of Medicine, which has contributed to enable us to provide the world-class medical education. In order to further strengthen the research and educational environment, we would like to recruit additional international faculty members in the School of Medicine.

The IUHW School of Medicine was established in April 2017, and has been pursuing innovative medical education unprecedented in Japan by, for example, accepting 20 outstanding international students each year mainly from Asia, holding classes mostly in English, and making it compulsory for our medical students to participate in clinical training at our partner universities and medical facilities overseas. Many guests from overseas have visited our state-of-the-art educational facilities, including the simulation center which is one of the world's largest with a site area of 5,300 m². We also drive the construction of a cutting-edge research environment by establishing research divisions such as the Institute of Medical Genomics equipped with the next-generation sequencer (NovaSeq). Furthermore, the educational and research environment has been enriched even more as the Graduate School of Public Health and the Graduate School of Medicine, newly established in April 2018, conduct infectious disease research and remote diagnostic imaging in collaboration with the School of Medicine.

Expansion of our group is still continuing as IUHW Narita Hospital with a capacity of 642 beds has just opened near Narita International Airport in March 2020. With an aspiration to become a world hub hospital, it has the featured centers such as International Remote Diagnostic Center, which connects with medical institutions located overseas for diagnostic pathology and radiology, and International Research Center for Infectious Diseases.

We welcome those who are willing to join us in our effort to creating the School of Medicine of the future. For further details, please refer to "Application Requirement." We look forward to your positive response, and thank you in advance.

高木 邦格

Kuninori Takagi, M.D., Ph.D.

Chairman, International University of Health and Welfare

Application Requirement

1 Field
Within the field of basic and clinical medicine, we are specially looking for candidates in following fields ①～⑥: ① Infectious Disease ② International Medical Cooperation ③ Global Health ④ Genetic Analysis ⑤ Remote Image/Pathologic Diagnosis ⑥ Physiology/Biochemistry Note: Candidates specializing in fields of basic and clinical medicine other than above ①～⑥ may also apply.
