

A journey in *Starch* solutions
answering all formulator's needs

Solubility, stability, regulatory, processability & patient compliance

TOPIC

Starches and starches derivatives used in the Pharma Industry

Starches

Starches in Pharmaceutical formulation
Stability improvement / Ease of lubrication / Disintegration
Simplify hard capsule filling (with powder)

Mannitol

Mannitol in Pharmaceutical formulation
Mannitol: access to the highest medicine stability
DC mannitol: excipient designed to ease QbD of pharmaceutical tablets

Cyclodextrines

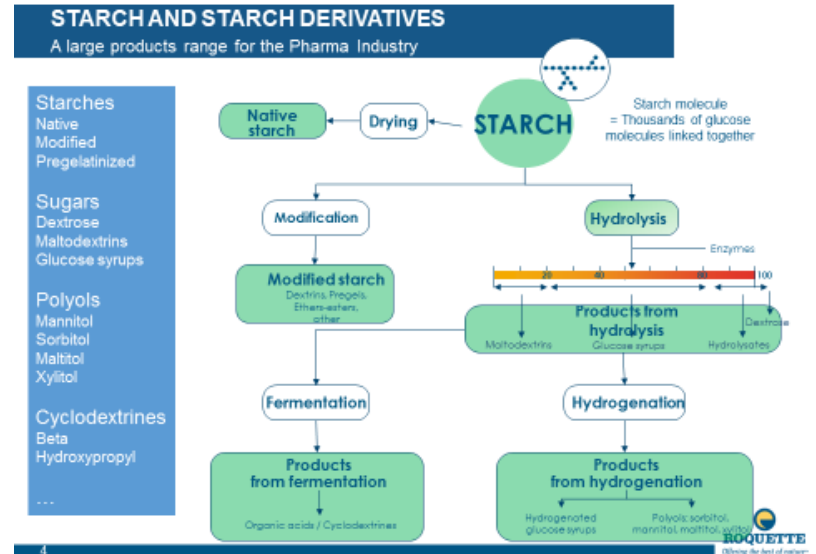

Cyclodextrines in Pharmaceutical formulation
Formulating for poorly-soluble APIs
Solubility & stability
Simple injectable formulations

Polyols

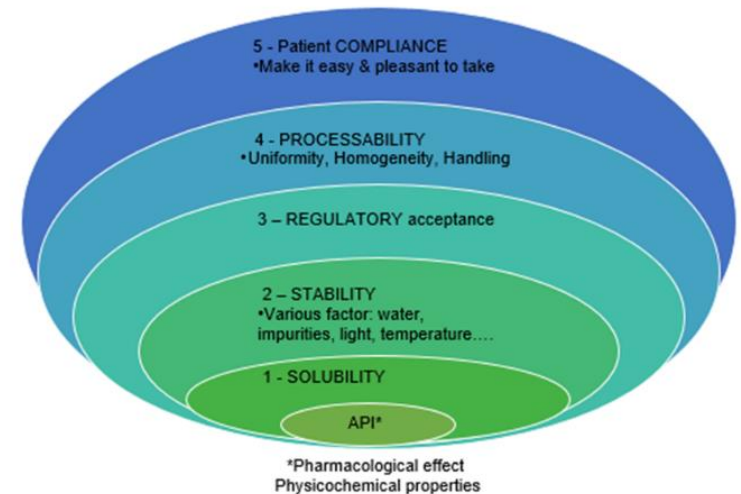

Polyols in Pharmaceutical formulation
Solid & liquid dosage forms
Stability
Access to a large range of taste and texture; improving patient's compliance

Questions and Answers

Starches & starch derivatives

Key formulator expectations
